

September 11, 1978

Memo to File:

RE: Atlas Minerals
Velvet Mine, Far West Mine
ACT.037/040, ACT/037/019

Mr. John Hunerjager called the Division on the morning of September 11, 1978 concerning the Velvet Mine located in San Juan County. The plans received on September 6, 1978 were nullified by John Hunerjager by a phone conversation with myself on September 8, 1978. These plans have been reactivated by Atlas and a contour map and narrative concerning vent shafts will be in the mail today.

The discharge at the Far West Mine noted by Mike Minder on the August 25, 1978 field inspection was checked by Mr. Hunerjager. It drains an area of the surface facility pad that is used to spray off trucks and other equipment.

K. Michael Thompson
Engineering Geologist
